# INFORMATION TECHNOLOGY

## Web Page - PIRATENET

PirateNet is a personalized web page that students and faculty members can customize to meet their information needs. This portal is designed to be a "one-stop" place for Park University faculty and students to access important information on the web. It also serves as a gateway to many online resources and communication tools at Park University. PirateNet features include:

- Easily enroll in classes, check grades, obtain degree audits, and more
- Integrated access to the PirateMail service and online course materials
- Quick access to online library resources as well as Park's calendars, news, and announcements
- A personal calendar tool for maintaining class schedules and appointments
- Personal web link customization on students' MyPark page using "Bookmarks"
- Communication with other students and club members through "Communities"

PirateNet can be accessed directly at <https://piratenet.park.edu> or from Park's home page at <http://www.park.edu>. To log on to PirateNet, faculty and students must use their Park ID number and their OPEN password, which is provided by the Student Assistance Center or the Campus Center Director (Photo ID required).

## Email - PIRATEMAIL

All students admitted to Park University automatically have a free email account assigned to them within 48 hours. **All official Park University correspondence will be sent to the student at this address. Students are strongly encouraged to check their PirateMail regularly.**

## Help Desk

The ITS Help Desk provides technical support for all Park University campus centers. The Help Desk's primary purpose is to supply front-line support to students, staff, faculty and others who utilize Park's technology services. The Help Desk can be contacted via email at [helpdesk@park.edu](mailto:helpdesk@park.edu) or by telephone between 8:00 am and 6:00 pm CST/CDT, Monday through Friday, at (816) 584-6768, or toll free at 1-800-927-3024.

## Information Technology Policies and Procedures

University information technology resources constitute a valuable University asset that must be managed accordingly to ensure their integrity, security, and availability for teaching, research and business activities. Carrying out this mission requires the University to establish basic Information Security policies and standards and to provide both access and reasonable Security at an acceptable cost. The University Information Technology Policies and Procedures are intended to facilitate and support authorized access to University information.

Users of University information technology resources are personally responsible for complying with all University policies, procedures and standards relating to Information Security, regardless of campus center or location and will be held personally accountable for any misuse of these resources. The Information Technology Policies and Procedures are located at <http://www.park.edu/itp.pdf>.

**The use of a student user id and password to access the computer system is the equivalent of a legal signature and creates the same obligations for the student. The student will be responsible for any and all future registration(s) by accessing the computer with the assigned id number. All transactions on the computer system constitute official records recognized by the institution. All appeal decisions related to policy or procedures will be based on the computer system transaction records.**

## e-COLLEGE

Within 48 hours of registering in the first course, students are granted access to eCollege (<http://parkonline.org/>). This system provides eClassroom - a virtual classroom for online courses, and eCompanion - an online supplement for face-to-face courses. Additionally, this can be used as a homepage and has links to the MBS Bookstore, PirateMail, and OPEN.

It is recommended that students test the computer system and explore eCollege before starting an online course. Access is available one week before classes start. Students are expected to be prepared and ready to work on the first day of the term.

To login, students need their username and password. The username is the student's Park ID number (six digits): e.g. 123456. To obtain password information, please contact the Help Desk during the hours of 8:00 a.m. - 6:00 p.m. CST/CTD , Monday through Friday.
