### EVELYN LARE SMITH ENDOWED SCHOLARSHIP

#### Donor Information

Evelyn Lare Smith attended Park College for three years where she studied Home Economics and Chemistry. She subsequently got a degree in Chemistry at Austin College. She worked for seven years as a chemist in pharmaceutical research at Mallinkrodt Chemical Corporation in St. Louis, Missouri prior to marrying Donovan Smith, a 1956 alumnus of Park College. Together they had two sons, Donovan, III, and Andrew. After the boys were in school, Evelyn was a substitute teacher in the Park Hill school district for many years. Over the years, the Smith's have been supporters of their alma mater, contributing to the Delta Gier Laboratory, the Hamilton Fund, the Library, and other projects at Park. Donovan was a member of the Alumni Council and served as its president in 1989.
