2012-2013

BSBA in Logistics

This program is designed to provide comprehensive knowledge and skill sets to students who wish to pursue challenging careers in a rapidly growing logistics area by serving the needs of a dynamic industry. The primary focus of the program is on the study of theories, concepts, and applications in the areas of procurement, operations, logistics, and transportation by preparing the student to excel in professional careers with manufacturers, shippers, retailers, logistics service providers, and government agencies. In addition, the program is designed to provide the student with the necessary preparation for graduate work in business administration and to assist with further advanced study and opportunities in preparing for the professional.
