## GRADUATE PROGRAMS

### Number of Students Enrolled, Graduate Programs (Fall 2017)

### Number of Degrees Awarded, Graduate Programs (2017-2018)

NOTE: Because the numbers reflect duplicated headcounts for students with double concentrations, the number of reported graduates in each area will not match the totals in IPEDS or other national surveys. For instance, the totals in the "Finance" programs include students in the BS Management/Finance program as well as those in the BS Business Administration program who are concentrating in Finance. This latter group of students are reported in the general business area in federal surveys. Students who earn a double concentration (for example BS Business Administration in Finance and Accounting) are reported twice in the chart above but only once (as general business) in federal surveys.
